

Project Design Phase

Problem – Solution Fit Template

Date	07 July 2026
Team ID	
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Template:

Problem-Solution Fit canvas

Purpose / Vision
Give every EV stakeholder a single, trustworthy view of charging patterns, battery health, and range data.

Version:
v1.0.0, July 2026

1. CUSTOMER SEGMENT(S) CS - City energy planners managing urban electricity demand - EV fleet managers overseeing taxi / delivery fleets - Prospective and current EV consumers (buyers/owners)	6. CUSTOMER LIMITATIONS CL - Limited data-analysis skills among non-technical staff - Budget constraints for enterprise BI/analytics tools - Need dashboard access from web, desktop, or tablet - Charging/sensor data availability varies by region	5. AVAILABLE SOLUTIONS AS - Manual spreadsheets - cheap but slow and error-prone - Generic BI tools (Power BI) - flexible but not EV-specific - OEM vehicle apps - only single-vehicle view, no fleet/city view
2. PROBLEMS /-PAINS PR - Hard to see charging demand patterns (daily) - Difficult to link battery health to driving range (per trip) - Time-consuming to compare EV models (one-time, high stakes)	9. PROBLEM ROOT / CAUSE RC - Charging, battery, sensor, and spec data are siloed - No dashboards tailored to non-technical stakeholders - No shared source of truth across planner/fleet/consumer roles	7. BEHAVIOR BE - Planners manually cross-check reports weekly (moderate) - Fleet managers react to breakdowns after the fact (high, costly) - Consumers browse many sites/forums before buying (high effort)
3. TRIGGERS TO ACT TR - Grid strain or complaints prompt planner analysis - Vehicle downtime prompts fleet investigation - An upcoming purchase prompts consumer research	10. YOUR SOLUTION SL - A Tableau-based EV analytics & visualization dashboard that ingests charging, battery, and vehicle data, and turns it into - Interactive dashboards for charging patterns, battery health vs range, and side-by-side EV model comparisons.	8. CHANNELS of BEHAVIOR CH ONLINE - Tableau Server / Public dashboard - Web app accessed by planners & consumers OFFLINE - Exported PDF / printed reports - In-person planning briefings
4. EMOTIONS EM - Before: frustrated, uncertain, overwhelmed by scattered data - After: confident, in control, reassured by clear insights
